

## AMENDMENTS TO THE SPECIFICATION

Please replace Paragraphs [0039] and [0073] with the following paragraphs rewritten in amendment format:

**[0039]** FIG. 15 is a fragmentary vertical sectional view to enlarged scale of the confronting surfaces of the T-shaped protrusion of the lower inclined ramp module and the T-shaped groove of the adjacent lower straight module of FIG. 2 when connected together and taken generally along the line and in the direction of the Arrows 15-15 in FIG. 2, with the section line in the direction of Arrows 15[']-15['] in FIG. 2 providing a view which would be a mirror image of FIG. 15 and thus that view has been omitted for purposes of simplicity;

**[0073]** Figure 2 shows examples of the variety of horizontal and vertical interconnections between the inclined ramp modules 12 and straight ramp modules 14 to provide a selective variety of modular ramp assemblies generally indicated by the numeral 10[']. As noted a number of the inclined ramp modules 12 and straight modules 14, are shown in phantom to indicate the variety of interconnections for different ramp assemblies. Thus the same end user can have the versatility of setting up ramp assemblies of different configurations for different objectives and even different uses, i.e. inline skates, skateboards, etc. This then allows the user to set up ramp assembly obstacle courses with different degrees of challenge.
